- Notes**
1. These are toll rate schedules analyzed for planning and testing purposes. Actual toll rates will depend on a final finance plan and will be determined by the Oregon and Washington state transportation commissions to meet legislative funding direction.
  2. Toll funding contribution ranges assume 30-year state-backed debt.
  3. No Toll scenario included for comparison purposes. Tolling is needed to fund the project.
  4. Assumes medium trucks pay 2x and large trucks pay 4x the auto toll rate using a transponder; administrative fee would be added to process payments not involving a transponder.
  5. Tolls are assumed to escalate at 2.5% per year to match the expected rate of inflation.
  6. Tolling during construction could be added to any scenario. Rates assumed to match Scenario 1A, except there would be no toll from midnight to 5am. Tolling early could provide about \$330 million in additional funds for construction.
